

Meet the MAGHRENOV Consortium at COP22

Following the achievement of the Paris Agreement, the COP 22 will take place in Morocco next week. Time is now to implement and invest to make the commitments of a huge majority of nations a reality.

The COP22 will be a key spot for the continuity of the policy support activities, and the spirit

of MAGHRENOV of “joint collaboration and the co-creation of solutions that promote innovation and sustainability across the Euro-Mediterranean basin” will be emphasized.

After three years of implementation, the MAGHRENOV consortium will deliver its recommendations and feedbacks on the results achieved to foster innovation in the field of sustainable energy and integration across the Euro-Mediterranean region. The MAGHRENOV Project has created opportunities in terms of **business development** and job creation and has promoted **economic growth** in the Mediterranean basin region. **Energy cooperation** is a key topic in the Euro-Med relation and can help for further integration of both regions.

The idea is to co-develop the sustainable energy **value-chain on both sides of Mediterranean** and develop a shared vision to stimulate the transition of EMIS, from a collaborative innovative space to a fully-structured innovation system.

Public-private partnership is key in the Euro-Mediterranean Innovation Space transition (EMIS).

For the EU, further cooperation with southern Mediterranean is strategic in terms of **domestic and external policy**. This leads us to reinforced partnerships based on three pillars:

- **Environment and Climate Change**
- **Social development**
- **Economic growth**

MAGHRENOV has clearly taken the approach supported by the EU to **exchange information, cooperate and cluster** to have greater integration and bigger impact at the national and regional level.

Where and when to find us at COP22?

- On IRESEN Stand, all COP22 week (Green zone, Civil society area)
- On InnoEnergy Stand, November 14th and 15th (Sustainable Innovation Forum, Stand n° 11, Four Seasons Hotel)
